

Liquid UI: WSCurl Get IP Address

Purpose

Retrieve the global IP Address using WSCurl.

User Interface

Log into SAP and on the SAP Easy Access Screen click on the 'Get IP Address' pushbutton which display the IP Address in the IP Address field.

The screenshot displays the SAP Easy Access interface. At the top, the title bar reads "SAP Easy Access". Below it is a navigation bar with several icons and text labels: "Other menu", "Create role", "Assign users", "Documentation", and "Get IP Address". The "Get IP Address" button is highlighted. Below the navigation bar, there is a label "IP Address" followed by a text input field.

User Interface file -

```
SAPLSMTR_NAVIGATION.E0100.sjs
1  load('wscurl');
2
3  // Function to check if the string value is blank
4  function isBlank(jvar) {
5      if (jvar==void 0 || jvar==" " || jvar==null) {
6          return true;
7      } else {
8          return false;
9      }
10 }
11
12 // Function to retrieve IP address using WSCURL
13 function getIPAddress(){
14     var wsCurl = new Curl();
15
16     /* Build the URL to make a call*/
17     var completeURL = "http://www.howtofindmyipaddress.com/";
18
19     /* This is the URL for your translation request. Note this use is for
20      * calls made to Google Translate which returns us the JSON object in string*/
21     wsCurl.setopt(Curl.CURLOPT_URL, completeURL);
22
23     /* Final step is to call execute to dispatch email. You can check the return
24      * code to avoid errata string which can be found from "wsCurl.error"
25      * return value 0 means success*/
26     var response = wsCurl.exec();
27     var error = wsCurl.error;
28     ipaddrline = response.substring(1670,1700);
29
30     if(!isBlank(ipaddrline)){
31         if(error == 0){
32             posStart = ipaddrline.lastIndexOf(">") + 1;
33             posEnd = ipaddrline.lastIndexOf("\n") - 1;
34             ipaddress = ipaddrline.substring(posStart,posEnd);
35             if(isBlank(ipaddress)){
36                 message('E: Could not find IP address, change URL');
