

Liquid UI: WSCurl SimpleHTTP

Purpose

Execute a simple URL and retrieve metadata information using WSCurl.

User Interface

Log into SAP and on the SAP Easy Access Screen click on the 'WWW.GUIXT.COM' pushbutton which displays the IP Address in the IP Address field.

Liquid UI Code [Script]

User Interface file -

```
SAPLSMTR_NAVIGATION.E0100.sjs
1  load('wscurl');
2
3  // Function to execute a simple URL and retrieve information
4  function simple_http() {
5      var wsCurl = new Curl();
6
7      /* Build the URL to make a call*/
8      var completeURL = "http://www.guixt.com/";
9
10     /* Note this use is for calls made to www.guixt.com which returns us the JSON object in string*/
11     wsCurl.setopt(Curl.CURLOPT_URL, completeURL);
12
13     /* You can check the return code to avoid error data string which can be found from "wsCurl.error"
14     | * return value 0 means success*/
15     var response = wsCurl.exec();
16     var error = wsCurl.error;
17
18     z_tmp = response.substring(0,2000);
19     copytext({"fromstring":"z_tmp", "totext":"z_text"});
20
21     /* Close the http connection for the URL fetch*/
22     wsCurl.close();
23
24     /* Remove any reference for Garbage Collection*/
25     wsCurl= NULL;
26 }
27
28 // User Interface
29 clearscreen();
30 pushbutton([1,0], 'WWW.GUIXT.COM', '?',{ "size":[1,15], "process":simple_http});
31 text([3,1], "http Details below - ");
32 textbox([4,1], [24, 100],{"name":"z_text"});
33
```
