Liquid UI for Android – License Type: USER

Liquid UI for Android can be licensed on a per **NAMED USER** basis or on a per **DEVICE** basis.

License Type: USER

This type of license will allow *1 (one) named SAP User* to be connected to SAP environment. Over usage of *1 (one) additional named SAP User* to be connected to SAP environment is allowed and granted (This can change in future releases).
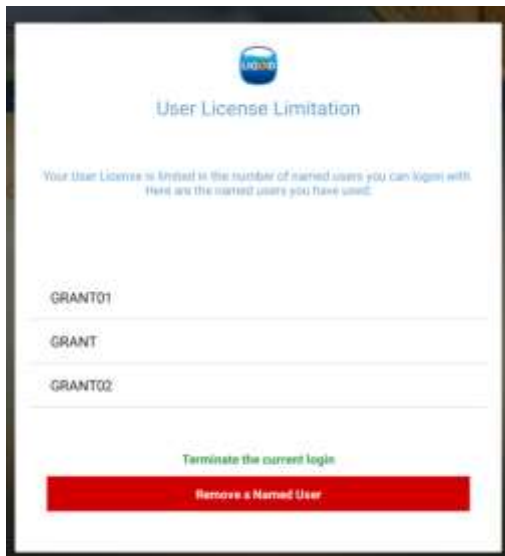

Effective Version: 4.24.6.0

A maximum for 2 named users will be allowed to login to SAP with this license type to maintain compliance.
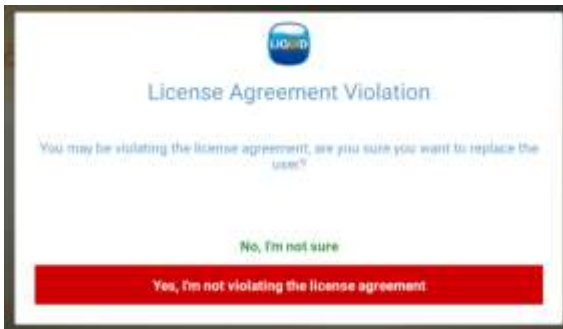

A license limitation popup will appear on the UI if additional named user logs into SAP environment, as it are not permitted with this license type.

See below for details on maintaining the usage for this license type when more than 2 named users logs into SAP Environment
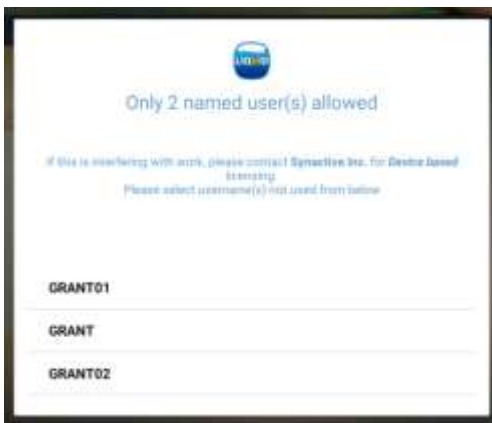

Below is displayed to user, when more than 2 named users logs into SAP environment.

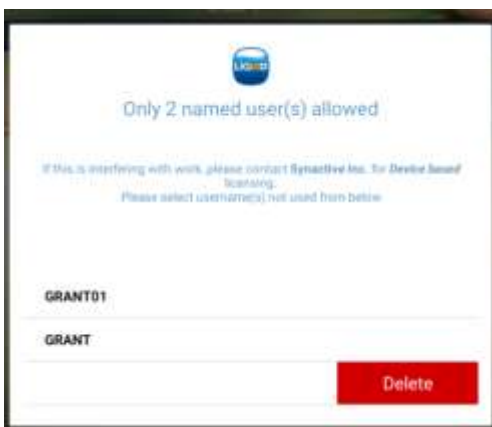

To continue using the application based on the license type purchased, click on 'Remove a Named User'. A License Agreement Violation screen will be displayed to the user.

Synactive, Inc. 2253 Harbor Bay Pkwy, Alameda, California, 94502, USA. www.guixt.com, sales@guixt.com

To continue removing the additional named user, click on 'Yes, I'm not violating the license agreement'. Below screen will be displayed.

To continue with removal of named user, swipe left on the named user you want to delete. Below screen will be displayed.

To continue with removal of named user, click on 'Delete'. This will remove the named user from the device.

After completion of all above steps, you can continue using the device for the 2 named SAP users. In the example of above screen shot, users GRANT01 and GRANT can continue to use the application as per the license type.

LIQUID

License Type: DEVICE

When there is a need to use multiple named SAP users on a single device, this type of license will be mandatory and required. This license type allows the customers to use the application across multiple named users and work shifts on a single device.
