

# LiquidUI: The Tip Command

---

The tip command is used to add tips to native SAP elements. It has a very simple syntax, taking the screen element as the first input and the tip you want to display as the second.

## User Interface

Log into SAP. Navigate to VA01 and in the Organizational Data group box, there is an input field called Division. User can see a symbol next to the field and when the mouse hovers over it, the tip message will display.

## Liquid UI Code [Script]

```
SAPMV45A.E0101.sjs
