

# WS Layout

## 12.08 Resize SAP pushbuttons

### Prerequisites

- Products: [Liquid UI WS](#), [Liquid UI Server or Local DLL](#), Client Software
- Commands: [buttonsize\(\)](#)

### Purpose

Learn how to resize the native push button on the SAP screen, using the `buttonsize()`.

In this example, we will demonstrate how to resize the native SAP pushbuttons Display, Create and Change of Function Builder: Initial screen(SE37) using `buttonsize()`.

### User Interface

*//Create this file inside your script folder for customizing the Function Builder: Initial screen: SAPLSFUNCTION\_BUILDER.sjs*

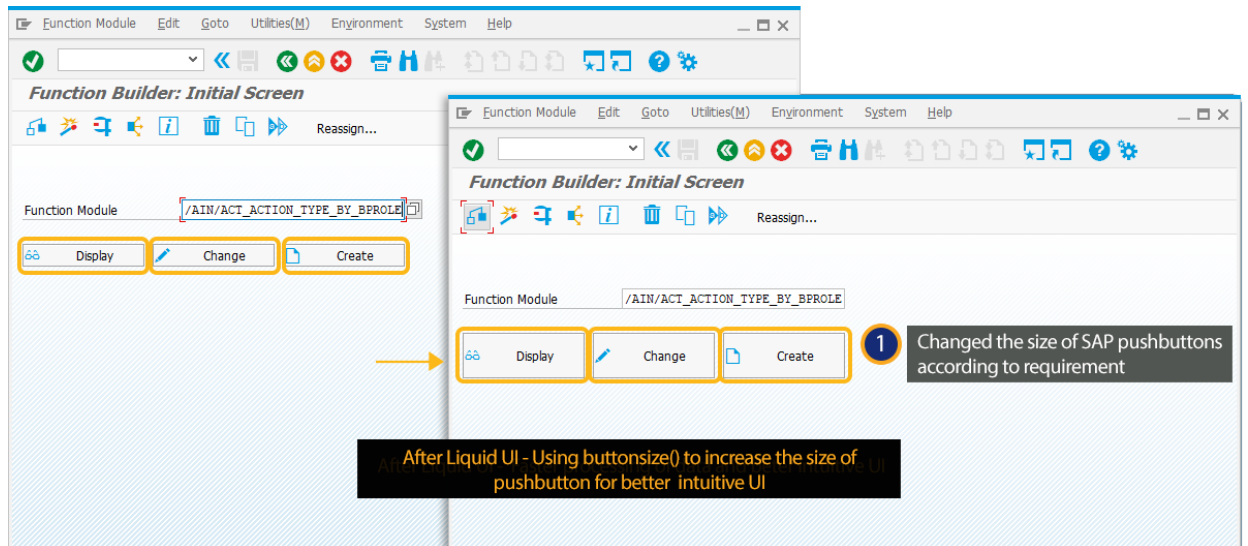

*//Now, let's start adding the Liquid UI script to the above file and save it.*

1. Logon to SAP and navigate to the Function Builder: Initial Screen(SE37).
2. Add the following code to the above file to resize the push buttons Display, Create and Change.

```
//Resizes the pushbuttons Display, Create, and change  
buttonsize("P[Display]", [2,16]);  
buttonsize("P[Create]", [2,16]);  
buttonsize("P[Change]", [2,16]);
```

3. Now, refresh the SAP screen to view the applied changes, as shown in the image below.
