

Web Server Appendices

6.4.3 Changing URL Templates

Important: You should only execute this section if the client number is different from '800' or the language is not English. Otherwise, skip this section and proceed to the [Associating Users with Roles](#) section of this document.

To change the URL template if the client number is not 800 or if the language is not English, please do the following.

1. Log into the SAP ERP system as an administrator and go to the following location as shown below.

Content Administration > Portal Content > GuiXT Fuzion

2. In the Property Category dropdown menu, select 'Content - Generic Launcher'. The following window will display:

Overview	
Save	Close
Preview	Refresh
Edit Mode	Display
Object	
Property Editor - GuiXT Fuzion	
Property Category	Content - Generic Launcher
Application Parameters	
Customer Exits for 'ParameterProvider'	
HTTP request method	POST
ID	
Show Debug Screen	<input type="radio"/> Yes <input checked="" type="radio"/> No
System	FuzionSystemAlias
Theme Subset	ur
URL template	<LAF.StyleSheetUrl>&SC_SSOCookie=<Request.SSO2Ticket>&SC_SSOClinum=800&SC_SSOLANG=E
URL template fraction for Single Sign-On (SSO2)	
URL template fraction for user mapping	user=<MappedUser>&passwd=<MappedPassword>

3. Scroll down to the URL template section. The default entry will be as follows.

```
<Request.Protocol>://<System.server><System.uri>?platid=SP&cssurl=<LAF.StyleSheetUrl>&SC_SSOCookie=<Request.SSO2Ticket>&SC_SSOClinum=800&SC_SSOLANG=E
```

Web Server Appendices

4. Remove the following section.

```
'&SC_SSOCLINUM=800'
```

5. Replace the section you just removed with the following.

```
'&SC_SSOCLINMU=[your client number]'
```

6. Remove the following section.

```
'&SC_SSOLANG=E'
```

7. Replace the section you just removed with the following.

```
'&SC_SSOLANG=[your language code]'
```

8. Click Save. The URL template is now modified. Proceed to the [Associating Users with Roles section](#).
