Web Server Appendices 6.4.5 Creating System Aliases

Once you have associated the roles with the users, you must create an alias for the system. To create an alias, please do the following.

1. Log into Netweaver as an administrator and go to the following location as shown below.

System Administration > System COnfiguration > Portal Content > Content Provided by Other Vendors > End User Content > GuiXTFuzi on

- 2. Double-click on FuzionSystem.
- 3. The Property Editor will display. In the Display dropdown menu, select 'Sytem Aliases' as shown below.

Browse Search	Overview FuzionSystem
Portal Content Portal Content Com.sap.ip.collaboration	Save Close Preview Refresh Edit Mode Display: System Aliases
Content Provided by Other V Content For Line Manager Content For Specialists Content For Specialists Content CouXT Fuzion CuXT Fuzion CuXTFuzion CUXTFuzi	Create new aliases for this system or delete existing ones. A system alias can be any name you choose. The default alias represents the system in other interfaces, such as User Mapping. Alias Name: Add
	Defined Aliases
	Default Alias Name
	No aliases have been defined for this system
Content Provided by SAP	王 苯 至 Page 1 / 1
Migrated Content Portal Administrators	Remove Set Default
Portal Users	Oser mapping status. A (not ready for user mapping configuration)
Specialist	Required actions: Dafine a default system alian

4. In the Alias Name field, enter the requisite system alias name and click Add. The User Mapping Status will change to the following.

User Mapping Status: Ready for user mapping configuration

5. Click the Save button and proceed to the <u>Assigning User Permissions</u> section.
