

Generating SAP Scripts in Workbench Running Scripts

Excel Sample Values

When Workbench generates an Excel spreadsheet, there are some sample values that are automatically input into the fields. This sample data is whatever data you employed when you made the recording. An example is shown below:

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O
1	Message	Order Type	Sales Organization	Distribution Channel	Division	Sold-to party	Payment terms	Incoterms	VBKD-INCO2	All items, Deliv. date	All items, First date	All items, Component quantity	All items, Material	All items, Order Quantity	All items, Date
2		OR	1000	10	00	1460	ZB02	CIF	San Francisco	D	11.06.2012	0,000	t-bw03-05	1	D

This sample data is explained as follows:

- Each field in which you entered data during the recording process is represented in the generated Excel sheet.
- The values you entered into the fields during the recording will be populated into the generated Excel spreadsheet.
- If the values are numerical, they are stored as text and this will be noted in the Excel spreadsheet.
