

# SAP Plant Maintenance Console Installation

## 2.2 Licensing PM Console

PSC licenses.

The Planning and Scheduling Console requires a valid license in order to function. Since this is a demonstration version, it will only function for a limited number of actions. Once the pre-designated number of screens has been reached, PSC will display the following message in the SAP statusline:

A screenshot of a SAP statusline message. The message is contained within a light blue rectangular box with a thin border. Below the box is a thick blue horizontal bar. The text inside the box reads: "Demo Version: Please Contact Synactive: sales@guixt.com".

Demo Version: Please Contact Synactive: sales@guixt.com

Note: To continue using the demo version after this message display, log out and log back into the PSC.

A purchased version of the PSC will include a valid license and so this message will not occur.
